

Bacem SAKJI

Computer Engineering Student

bassems944@gmail.com | +216 55 733 616 | La Soukra, Ariana 2036

SUMMARY

Computer Engineering student specializing in secure AI systems. Combines machine learning implementation with hardware-level security design. Experienced in deploying hardened ML models on embedded platforms and analyzing system vulnerabilities. Seeking roles in AI security, trusted hardware, or secure edge intelligence.

PROFESSIONAL EXPERIENCE

Internship – Cybersecurity, CIMF

July 2025

- Utilized security tools such as Kali Linux, Wireshark, Nmap, and Hydra
- Conducted network traffic analysis and vulnerability identification
- Contributed to the detection and mitigation of security threats

Internship – Academic Support (Tutoring), Coworking Space

July 2024 - Aug 2024

- Designed and created interactive programming courses for baccalaureate students
- Developed educational materials and recorded explanatory videos
- Collaborated with a pedagogical team to ensure the quality and clarity of learning modules

SKILLS

Python, Java, C/C++, Angular, SpringBoot, Kali Linux (Wireshark, Metasploit, Burp Suite), Traffic Analysis, Cryptography Basics, Network Security, Embedded C/C++, PyTorch, Android Studio, Figma, Git, Analytical Problem-Solving

EDUCATION

Engineering Cycle in Computer Engineering

Faculty of Sciences of Tunis

2024 - Present

Scientific Preparatory Class (MP)

Preparatory Institute of Monastir

2022 – 2024

Baccalaureate in Mathematics

Pioneer High School Monastir

2022

ADDITIONAL INFORMATION

- **Languages:** English, French, Arabic
- **Certifications:** TCF(C1), CCNA1
- **Activities:** CPC Club Member ,CTF, Hackathons
